

DEVOPS CULTURE AND MINDSET

The Importance of Iteration and the Evolution of Roles

Courtney Kissler
Vice President
Digital Platform Engineering
Nike

UCDAVIS

Continuing and Professional Education

Learning Objectives

Discuss importance of **iteration**

Describe **evolution of roles**

Explain **benefits** of DevOps approach

The Value of Starting Small

Learn what works and what does not

Then **scale** to entire organization

Slide 3: Why not “go big” to start?

Why not “go big” to start?

It has a certain appeal

Benefits of Pilots and A/B Testing

Make sure it **works**

Incorporate learning as you go

Pilots at Nike

Focusing on just **6 pilot teams**

Once we figure things out, then we'll scale to **hundreds of teams**

Start Small with Feature Delivery

Start small

Get immediate feedback

Learn fast

Adjust

Traditional Silos

Dev Team

QA Team

Operations

Benefits of an Integrated Team

Able to be **proactive**

Fix code before testing

Fast **feedback loops**

Rolling Out Organizational Change

Starting small & running pilots saves:

Time

Money

Effort

Product Owner Role

Let **business systems analysts** take on product owner role within development teams

Product owner role is **most critical**

Day-to-day **decision maker**

Evolution of Developers

Change mindset to: **Developer/Engineer**

Accountable for **development**, **quality**,
security, and **non-functional requirements**

Important to help developers see the
bigger picture

Lines around Roles are Blurring

Development

Quality Assurance

Operations

Traditional Roles and Lines Were Clear

Business analyst **wrote requirements**

Developer **wrote code**

QA tested and **assured quality**

DevOps and Lean Culture

Team members play **multiple roles**

To effectively **deliver value** to customer

An Example from Nordstrom

Moved all needed roles into **1 team**

CI/CD pipelines **built together**

Product feedback built into the process

An Example from Nordstrom

Quickly **delivered value**

Identified and **resolved**
issues **in hours**

Driving a **ton of revenue**

Summary

DevOps requires people to re-evaluate

Change their roles

Shift their thinking
