

Lesson 2.1: Module 2 Introduction

DEVOPS CULTURE AND MINDSET

Module 2 Introduction

Courtney Kissler
Vice President
Digital Platform Engineering
Nike

UCDAVIS

Continuing and Professional Education

Welcome Back!

Module 2: Working with a DevOps Mindset

Discuss how loosely coupled architecture can help facilitate high-performing organizations

Discuss the importance of iteration

Describe strategies for managing risk and workloads

Discuss tactics for managing unplanned work

Learning Objectives

Debunk two Common Software Development Myths

Myth #1: Having lots of work-in-process is *best* way to get more done

Myth #2: “Making work visible” doesn’t work in a DevOps environment like it does in manufacturing

Explain why these two myths are a fallacy
